

Newsletter 1 EBP e-Toolkit Project

Know the project

[The EBP e-Toolkit project](#) is a Strategic Partnership of six European Higher Education Institutions in the framework of the Erasmus+ programme

- University of Murcia (Spain, coordinator)
- University of Modena and Reggio Emilia (Italy)
- University of Ostrava (Czech Republic)
- Medical University of Warsaw (Poland)
- Hellenic Mediterranean University (Greece)
- Angela Boškin Faculty of Health Care (Slovenia)

The project has a duration of 42 months, from 01/09/2018 to 31/12/2021.

Project Reference: 2018-1-ES01-KA203-050216

The project has been founded by the Erasmus+ Programme with a Grant of 164.185 EUR, take a look at the [E+PRP Project CARD](#)

The objective

The general objective of the project is to foster and harmonize the teaching and learning of EBP in the European Nursing curricula and to produce the acquisition of EBP competence earlier in professional life that can be continued for lifelong self-directed learning also among nurse educators and clinical mentors.

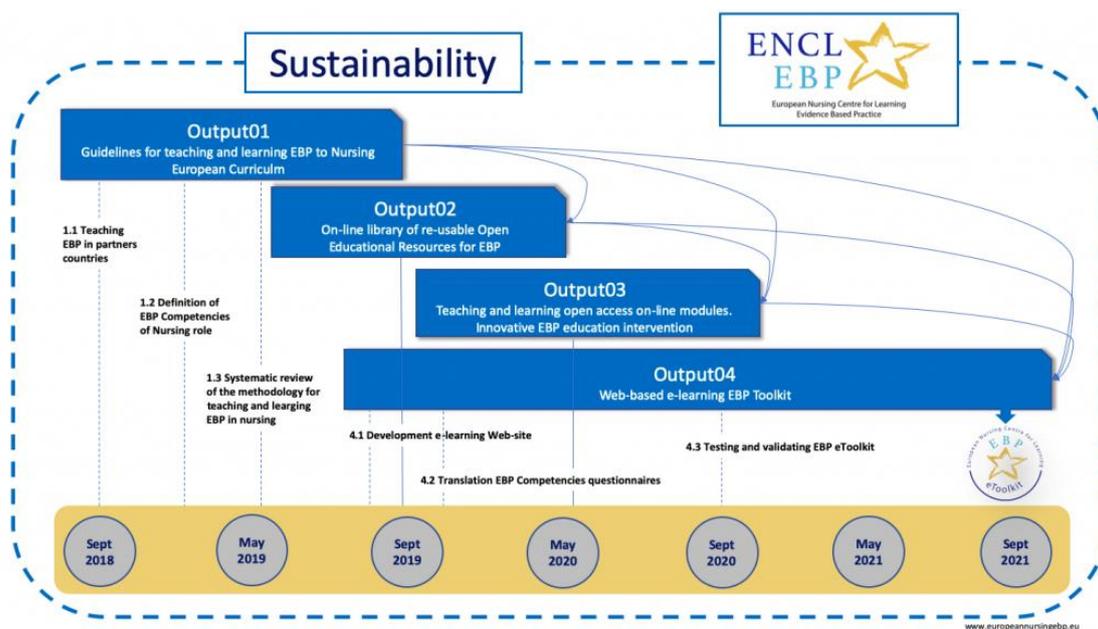

Specific objectives of the project are to analyze the current situation of EBP in European Nursing Curricula, to agree on a European EBP Competency framework and to develop Guidelines on the recommendations for the teaching and learning EBP to Nursing European Curriculum.

Following the recommendations of this preliminary work we plan to develop a joint curricula and a EBP e-Toolkit (including an e-course and an open electronic resources

library) with a pedagogical strategy for learning and training EBP in nursing oriented to undergraduate nursing students and professional nurses.

Finally we will validate the innovative educational intervention using EBP e-Toolkit among nursing students and educators (academic and clinical mentors).

The Open Educational Resource (OER) is the 2nd Output of the EBP eToolkit Project. This is an online library that includes all types of online and free licensed resources related to Evidence-based Practice (EBP), focus on nurses learning.

Target audience are nursing students, nurses, educators, and nurses in general interested in learning EBP.

You will find open-access resources in different formats to learn and practice EBP. They are available in English and all the 6 languages of the EBP eToolkit project partner's members (Spanish, Greek, Italian, Polish, Czech and Slovene).

A rigorous and exhaustive evaluation of the resources' quality were carried out. This means that each resource was evaluated scoring from 0 till 32 and resources were included with minimum 12 points.

OER platform permit to search resources through the access to the 7 EBP steps categories and subcategories (see menu below) or filter by categories, language, quality score, format or target user group.
